

Sign up and fill out a mission application at: <http://www.managedmissions.com/>

You will need to create a managed missions account with a username and password.

You can then start to fill out an application at:

<https://app.managedmissions.com/MissionApplication/Start/6312>

It is best to complete the application all at once.

What you will need to complete the application:

Passport information

Insurance information (if you have insurance)

Medical information including medications

Your pastor's phone and email or another personal reference's phone and email

Two people you would invite to pray for you while on the trip and their email address

Personal hopes for the trip

Which week you desire to be in Paraguay and the number of weeks you would want to stay

Here are the steps to go back and work on your saved (but not submitted) application:

1. Login to your managed mission account at: <http://www.managedmissions.com/>  
-you will not see your saved application.

2. Once logged in to Managed Mission return to your email and click the link to the Managed Missions Application in your email. It will take you to your saved application so you can complete it.

Once again completing the application in one time is the best.
